KOTOR

Kotor is listed in the UNESCO World Heritage register due to its cultural significance.

LOCATION AND CLIMATE

Kotor is a coastal town and port in Montenegro, situated at the most secluded and southern part of the Bay of Kotor, at the foot of the steep Lovcen cliffs.

Kotor and its surrounding area have typical Mediterranean climate, characterized by warm, dry summers, and mild, moist winters. The average temperature is 15,2 °C. The warmest month is July with the average temperature of 24,1 °C, whereas the coldest month is January with 7,7 °C. The most frequent winds in this area are south-eastern and southern ones.

HISTORY AND SIGHTS

The area of Kotor was already inhabited in the Neolithic. The old Greeks, and later Romans, also inhabited the town, whereas in the 7th century it got under the rule of Byzantine and thus became the main centre of the whole bay with its own merchant navy. The town later became a part of the Venetian Republic and defence walls were built in order to protect the town from Turkish invasions. These walls remained preserved until today, although the town area was ruined several times due to earthquakes. From the 18th century onwards, Kotor came under the Austrian rule and became a significant military port during the World War I, and after the World War II it was annexed to Yugoslavia.
